## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The species of the organic compound having lipophilic and hydrophilic groups:

The election of specific species of  $R^1$ ,  $R^2$  and X, or a specifically named organic compound is required.

If the alkyl groups are elected as  $R^1$  or  $R^2$ , the election of linear, branched, saturated or unsaturated groups is required. Further, the election of groups with replaced or not replaced  $-CH_2-$  is required. Further, if the groups with replaced  $-CH_2-$  are elected, the election of the specific constituent is required.

For X the election of species in which H is replaced or not replaced is required.

If the species with replaced H is elected the election of the replacement group is required.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1746

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the claimed species represent a number of different classes of organic compounds and thereby lack corresponding technical features.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 703-308-7545. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy P Gulakowski can be reached on 703-308-4333. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
